

Kesmit

23' Wilderness Beaver

£45,000

'Kesmit' is one of a pair of these popular compact narrow boat style GRP cruisers that were built to the 'gold' specification by Clearwater Boats and purchased brand new in November 2023. Good use is made of the internal space with a fully equipped galley, WC compartment, comfortable saloon and any combination of single or double berths to sleep four. The forepeak and cruiser stern deck covers mean these areas are useable spaces in all conditions. The advertised price is a considerable saving of £10,000 on the new price and the seller may consider a small discount if a purchaser should buy both boats. Viewings are available 7 days a week by appointment please.
