Viking 24 Hi Line

£39,950

A well maintained example of the very popular Viking 24 Hi-Line model built in 2018, which has been fitted with several extras to enhance the boat's use in all seasons, including diesel warm air heating, solar panels and a bow thruster. With only 234 hours running time, the boat is relatively unused for its 6 years and a great opportunity for a couple or family to get on the water in style and comfort. Engine serviced 2024 and antifouling due to be renewed prior to sale. Available for viewings 7 days a week by appointment please.
